

To FCC; I am an truck driver, and very much depend on the weather and traffic reports that XM satellite radio provides. The service is very dependable and up to date. Weather someone tavalas alot, or not satellite radio is great. Threr is programing to satisfy everyone, with out enteruption. I would not pay for a product that I didn't like. Or with a lot of commercials.

Please do not give in to the redictulous demands of broadcast radio. Please don't limit XM Satellite Radio from doing such a great job, and providing such a great servvice,

Sencirely,
Don Sutton
